

## ASCO MONITORING GATEWAY ACCESSORIES

The Monitoring Gateway (Accessory 107G) monitors the state and performance of your transfer switch and its associated devices, including engine-generators, utility power quality meters, surge protection devices, and circuit breakers. The Monitoring Gateway simplifies the NFPA 110 fire code and Joint Commission compliance and reporting activities required for critical and healthcare facilities. It is compatible with Building Monitoring Systems, sharing data in open Modbus TCP/IP and BACnet IP formats.

Meets NFPA and Joint Commission Compliance requirements

Provides required engine-generator and transfer switch safety indicators and shutdowns. Automatically generates NFPA test and utility outage reports. Listed to UL 1008.

Gain real-time status and performance insights

Provides instant access to critical utility power, engine-generator, transfer switch, surge protection and load bank information. Transmits immediate email and text alerts of alarm and event conditions.

Integrates with common building monitoring systems and the ASCO Critical Power Management System

Shares power system data with other monitoring systems, allowing greater analysis of operating data and faster response to changing conditions.
